

## Job Description – Business Data Analyst

### Reports To – Director, Commercial Insights and Analytics

#### Job Responsibilities

Our team is looking for a skilled analyst with experience in designing, validating, and optimizing data visualization tools, with a strong focus on Tableau. This role will collaborate closely with business stakeholders to refine essential data metrics and transform them into engaging, insightful dashboards and reports that drive strategic decision-making.

#### General Description and Duties:

*To perform this job successfully, an individual must be able to perform each essential job task satisfactorily. The tasks listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.*

- Design and develop data analysis and visualization solutions that drive executive decision-making and actionable commercial insights.
- Create new interactive dashboards and reports in Tableau to reinforce corporate strategies.
- Maintain and enhance existing Tableau dashboards and reports.
- Collaborate with business stakeholders to understand the effectiveness of current data visualizations and identify opportunities for continuous improvement.
- Diagnose and resolve any problems related to data, dashboards, or reports.
- Ensure data accuracy and consistency through close collaboration with the Commercial Analytics team.

#### Projects and Other Duties:

- Other duties as assigned by manager.

#### Position Qualifications

- Highly experienced with Tableau's data visualization platform
- Comprehensive understanding of data visualization best practices
- Knowledgeable with database concepts and extensive hands-on experience with SQL
- Excellent data analytics skills using Excel
- Familiarity with data warehouse and integration tools (e.g. Snowflake)
- Strong organizational, project management, and documentation skills
- Team player with excellent communication and troubleshooting skills
- Capable of quickly learning Axonics' business and commercial strategies
- Ability to work effectively in a fast-paced environment while maintaining a strong attention to detail

#### Minimum Education:

- Bachelor's degree (Business Analytics, Computer Science, or related field)

### **Minimum Experience:**

- 3 years in data visualization, data analytics, or similar role
- Proficient with Tableau, Excel, and SQL
- Tableau Data Analyst certification preferred
- Sisense familiarity helpful
- Prior experience in the Healthcare industry preferred
